PROFILE

GIS and IT professional with 3+ years of experience performing spatial analysis, data QA/QC, and managing enterprise GIS environments. Driven to solve complex problems and enhance GIS workflows with a proven track record of translating operational needs into technical solutions. Relocating to the Philadelphia area after graduating in December.

EDUCATION

Texas A&M University August 2023 - December 2026
Bachelor of Science in Geographic Information Science and Technology

EXPERIENCE

GIS Technician Intern May 2025 - Present
City of College Station - Information Technology *College Station, TX*

- Manage and update the City's enterprise GIS alongside the IT GIS Coordinator and IT GIS Analyst to ensure integrity of spatial data and provide overarching policy guidance for departmental use.
- Develop 4 public-facing web applications to enhance community access to important City information.
- Gather business requirements from department leaders to translate spatial data into actionable reports.
- Digitize and georeference municipal data to enforce quality assurance for multiple important city-wide datasets.
- Establish long-term workflows by writing technical documentation to ensure continuity in enterprise management.
- Track projects, manage assets, and resolve over 250 technical GIS support requests with Jira by Atlassian.

Aggie Orientation Leader April 2024 - January 2025
Texas A&M University - New Student & Family Programs *College Station, TX*

- Advised and supported 13,000+ new students through 22 2-day orientations to the university.
- Developed strong leadership and public speaking skills by speaking in front of large audiences.

PROJECTS

ArcGIS Server Upgrade and Portal Deployment for Enterprise Operations January 2026 - Present
GIS Technician Intern

- Contribute to the migration of the City's enterprise server from ArcGIS Enterprise 10.9.1 to 11.3 with the addition of Portal for ArcGIS, deploying clean architectures on new Azure virtual machines for the upgraded environment.
- Resolve configuration and compatibility issues during deployment, including certificates and web adaptors.
- Federate the ArcGIS Server site with ArcGIS Portal to ensure security and uniformity for City GIS staff.
- Implement an in-place geodatabase upgrade using DBMS to preserve existing Spatial Database Engines (SDEs).

Spatial Analytics for College Station Fire Department Accreditation April 2026 - August 2026
GIS Technician Intern

- Aggregated and cleaned 5 years of historical incident data for geospatial analysis on heat maps and travel time compliance to support the Fire Department's rigorous national accreditation process.
- Modeled response reach through network analysis and planning zone risk assessments by dasymetric mapping.
- Integrated county-wide datasets to consider pipeline and railroad hazards across Brazos County.

GIS Guestbook Solution for City of College Station Economic Development October 2025 - January 2026
Project Manager/GIS Technician Intern

- Engineered a web-based GIS application pipeline using ArcGIS Survey123 and Experience Builder for real-time spatial visualization of visitor data and to simultaneously manage visitor statistics for staff.
- Leveraged the City's existing ArcGIS infrastructure to deliver a cost-effective alternative to third-party software and reduce dependencies on external vendors.
- Facilitated project handoff by authoring technical documentation and presenting a staff training session.

SKILLS

Software and GIS: ArcGIS Enterprise (Server and Portal), ArcGIS Pro, ArcGIS Online, Experience Builder, Survey123, Dashboards, Business Analyst, SQL Server Management Studio, Adobe Suite, Microsoft Office Suite
Programming: Java, JavaScript (Leaflet.js), HTML, CSS, R, Python, ArcPy
Certifications: Criminal Justice Information Services Security and Privacy Training (CJIS)
